

SEASONAL CONSERVATION RATES

In the six months between May 1st and October 31st, a seasonal water conservation rate will apply to water use in excess of 8,000 gallons per month. The first 8,000 gallons of monthly water use will be billed at the normal rate of \$10 minimum for up to 1000 gallons of use and \$6 per 1000 gallons of use up to 8,000 gallons. For any water usage over 8,000 gallons per month, you will be billed at the seasonal water conservation rate of \$8 per 1000 gallons. Therefore, if you use less than 8,000 gallons in a month, you will be billed at the normal rate and see no difference in your monthly water bill. Call the water office for additional information, 426-8230.
