

Free Pharmacy Program

Information Sessions

NC MedAssist is a nonprofit pharmacy that provides free prescription medication to low-income and uninsured North Carolinians. There is no cost to apply or receive the medicines. All medications are mailed to the patient's home address. Now more than ever, the choice between purchasing food or medicine is being felt by our neighbors and NC MedAssist is here to help!

Join us for a free webinar to learn about our **Free Pharmacy Program**, who qualifies, how to access it and what you can do to help your patients and clients get the life-saving medication that they need.

All sessions are one hour and start at 11:30am.
